

February 23, 2016

The Honorable Pat Roberts
Chairman
Senate Committee on Agriculture, Nutrition, and Forestry
328A Russell Senate Office Building
Washington, DC 20510

Dear Chairman Roberts,

On behalf of the Coalition for Safe and Affordable Food, we want to thank you for your strong leadership aimed at enacting a national uniform solution on biotech labeling. We, the undersigned organizations, represent all segments of the U.S. food chain—producers, cooperatives, agribusinesses, processors, seed makers, handlers, food and feed manufacturers, lenders, and retailers. It is vitally important for the Senate to take expedited action in order to avoid the economic costs of a patchwork of state laws that will directly impact consumers, farmers, and the entire food value chain.

Mr. Chairman, we strongly support your recently released proposal and look forward to working with you, Ranking Member Stabenow, and other Members of the Committee on this important piece of legislation. The issue of biotech labeling is one of the most significant issues that the agriculture and food industry has faced in recent years. The U.S. agriculture and food industry creates over 17 million jobs, representing nearly 10% of all U.S. employment and creating 5% of U.S. economic activity. This very system—which produces the most abundant, the highest quality, and the most affordable food supply in the world—will be threatened with large economic costs without a national uniform solution to the biotech labeling issue.

The application of biotechnology to agricultural production has led to increased crop yields, decreased use of pesticides, and lower food costs for consumers. Congress must ensure we avoid senseless mandates that will thwart agricultural advancement and hurt consumers—especially those low income Americans who can least afford to pay more to feed their families.

Last fall, you chaired an extensive hearing on biotech and biotech labeling. Witnesses from the three government agencies that have principal oversight of biotech approvals—the U.S. Department of Agriculture, the U.S. Food and Drug Administration, and the U.S. Environmental Protection Agency—all reaffirmed their long standing recognition of the safety of the technology. There was also broad discussion at the hearing about the need for a national uniform solution and that any solution should not stigmatize this important tool for our Nation's farmers. Mandatory on-pack labeling of foods produced using biotechnology would mislead consumers and drive up their grocery bills.

Mr. Chairman, again we thank you and other Members of the Committee for the strong leadership that you are providing on this issue. We also thank you for your recognition of the deep sense of urgency to address this patchwork of state laws that threatens the U.S. agriculture and food industry. We stand

ready to work with you and other Members of the Committee to ensure there is expedited action on this important legislation.

Sincerely,

Adisseo
